## Migrate Email Data between ALL Messaging Systems
Accurately, Efficiently, Affordably!

WHY TRANSEND?

- ✓ **Experience** – 30+ million mailboxes worldwide

- ✓ **Flexibility** – No two migration projects are ever the same! Customize the tool for nearly every project to meet specific needs

- ✓ **Unparalleled Technical Support** – The most experienced and responsive US-based support team assists with migration from beginning to end

- ✓ **Accurate, Reliable and Repeatable Results** — Data fidelity maintained completely in both the source and target system

On-Premise Migrations

Exchange · Novell GroupWise · IMAP · zimbra · MIRAPOINT

…and **many more**!

Cloud Migrations

Office 365 · Exchange · Google Apps · IBMSmartCloud · amazonWorkMail

…and **many more**!

KEY FEATURES & BENEFITS

Highly Scalable
Migrate multiple accounts concurrently on the same workstation - significantly increases overall throughput. Run Transend Migrator on unlimited workstations (physical or virtual) at no additional cost

Real-time Reporting
View real-time status of all user mailboxes as they are migrated

Schedule Migration
Schedule a migration to begin at a later time by setting pre-determined start time, as well as pause and re-start on the fly

Command Line Processing
Sophisticated users can automate batch processing via command line to run in virtually any environment

Custom Options
Hundreds of *Custom Options* alter the default behavior

Language Translation
Transend Migrator automatically determines what type of character set conversion is necessary for migration

Supports Multiple Methodologies
Run a single-pass migration (big bang!) or a multi-pass migration with powerful deduping and filtering functionality

Migration Consulting
Develop a migration plan with a Transend Migration Expert during evaluation, at no additional cost

Migrate ALL Data Types
Messages/Attachments, Calendars, Contacts, Tasks, Archives

Shared Folders
Supports the migration of shared/public folders in select systems

EXECUTIVE SUMMARY

Transend Corporation, headquartered in the heart of Silicon Valley, provides industry leading solutions to convert, migrate, integrate, archive, review and extend enterprise messaging and collaboration. With corporate offices in Palo Alto, California, and engineering, research and development offices in Washington, Oregon and Florida, Transend has a long-standing history of continuously exceeding customer expectations with leading-edge technology and unparalleled customer support from highly-trained, certified and knowledgeable experts.

With 25+ years experience developing solutions for email systems world-wide, Transend offers award winning email migration and conversion solutions that support virtually all email systems. Transend offers two variations of solutions focused on industry needs:

➢ **Transend Migrator** -- For organizations that need to migrate legacy email data when converting from one email system to another

➢ **Transend Migrator Forensic Edition** - For eDiscovery and compliance organizations that need to convert email data to a format suitable for their eDiscovery and monitoring tools

Transend's industry leading software solutions have been used by large and small organizations, as well as individuals, around the world to convert well over **30 million** mailboxes between virtually all possible combinations of email systems. With technology specifically designed for rapid throughput, maintenance of data fidelity, adaptability and ease of use, Transend's solutions are suitable for, and have been used by, organizations converting hundreds of thousands of mailboxes.

➢ **Privately held since 1983**

➢ **Microsoft Gold Certified Partner**

➢ **IBM, Google, Amazon Business Partner**

➢ **Worldwide representation with business and technology, resellers and distribution partners on every continent**

"We converted 40,000 mailboxes with Transend Migrator from a variety of email systems to Exchange. The migration was carried out without disruption in multiple regions in parallel. Automating the entire migration workflow yielded a surprising speed of execution which was 50% above target and avoided $500K in outside service costs and $800K in legacy license fees."
