TECHNICAL REFERENCE GUIDE

Granting Access to the Transend Google Service Account

Copyright by Transend Corporation

Section 1: Overview

Transend has set up an existing service account that will be used by default. Although this is easy to use, please note that using this account opens up a security hole, in that anyone who has purchased Transend Migrator **and your user email addresses** will be able to access your data during the period that access has been granted to that account. Please see our documentation on <u>Setting up a Google Service Account</u> for a more secure method.

Note: you still have to grant access to Transend's service account (email

24974064516@developer.gserviceaccount.com), and as previously noted, this opens up your data to anybody with Transend Migrator so it is recommended to setup a service account with administrative rights.

Section 2: Grant access to the Transend Migrator Service Account

1. Open Google Admin Console (<u>https://admin.google.com</u>).

Click Security

Click MANAGE DOMAIN WIDE DELEGATION

| API controls | App access control Manage app access to your Google services. Ensure that users can give access only to apps that your organisation trusts. Learn more | | | |
|--|---|--|---|--|
| Use these controls to enable or restrict access to G Suite APIs for custome-owned and third-party applications and service accounts. Reduce the risk associated with third-party access to G Suite APIs by limiting access to only trusted apps. | Overview | 0 restricted Google services 15 unrestricted Google services MANAGE GOOGLE SERVICES | 1 third-party apps configured MANAGE THIRD-PARTY APP ACCESS | |
